

## CHARACTERISTICS

The Alaska PLUS model is designed to make a good impression on your event attendees. Fully lined with wood on the outside. Compositions of 2-4-6 pieces can be made ... depending on the expected influx of guests. Side and front enclosures included. The interior has a large mirror, wastebasket, soap dish, toilet roll holder and sink with a foot pump. Manual internal and external closure with special lock. Entry of light with translucent ceiling or interior light by means of a fixture with connection to the 16 amp electrical network (electrical supply by the customer). It is necessary that the floor is firm and uniform so that the composition is as in the sample images
